Product-focused professional with a full-stack background and a Business Administration degree, seeking a Product Owner role. Experience in backlog management, user research, MVP definition and stakeholder-informed prioritization. Participated in Scrum ceremonies and helped define acceptance criteria.

PRODUCT & TECHNICAL SKILLS

Product: Backlog management, roadmap prioritization, acceptance criteria, Scrum, user research, MVP definition, stakeholder collaboration, Jira, Figma

Technical: React, TypeScript, Next.js, PostgreSQL, Supabase, Prisma, Vitest, Playwright, Git/GitHub

PRODUCT & SOFTWARE EXPERIENCE

MedShift | Full Stack Developer & Product (own product)

Mar 2026 - Present

- Ran a 50-response survey that changed positioning, pricing assumptions and MVP priorities; independently managed the backlog and development.
- Shipped a closed beta used by 3 doctors, mainly to check expected monthly pay and receive payment reminders; 2 have used it for three months.
- Built payment forecasts, Google Calendar sync and data isolation, with unit, SQL and mobile E2E tests.

Weedly.uy | Full Stack & Business Developer

Feb 2025 - Mar 2026

- Defined MVP scope and roadmap and independently managed the backlog; ran discovery meetings and established club partnerships to guide product requirements.
- Designed and implemented the full-stack architecture with Next.js, TypeScript, Prisma and PostgreSQL.

iParkings | Frontend Developer

Nov 2023 - Dec 2024

- Managed the backlog and helped define acceptance criteria; decided priorities considering sales, my manager, the client and end users.
- Reduced the self-payment flow from 6-8 to 4-6 steps. Complaint tickets recorded in Jira decreased by 40%. The parking facility received 150,000 users/month.
- Built Free Parking mode, led UX/UI and functional testing, and coordinated with backend and hardware teams.

TengoKarga | Full Stack Developer

Nov 2021 - Nov 2023

- Reworked order creation into a step-by-step flow and built super-admin impersonation tools for internal support using React, Node.js and MongoDB.
- Managed the backlog with the lead developer and participated in Scrum ceremonies, QA, PR reviews and deployment follow-up.

ADDITIONAL EXPERIENCE

GreenLight.ai | AI Trainer & Reviewer

Jun 2026 - Present

Independent contractor. Produce structured model evaluations and review peer submissions against detailed rubrics; promoted to reviewer.

Altisource | Accounts Payable Sr. Analyst / Payroll Associate

Feb 2015 - Nov 2016 / Dec 2011 - May 2013

Coordinated financial operations with teams in the US and India, reconciling payments and meeting payroll deadlines.
