

Alfonso Rodriguez

Full Stack Developer

RodriguezAlfonso20@gmail.com | (598) 091-633-855 | Montevideo, Uruguay | Portfolio | LinkedIn | Github

PROFILE

Full Stack and Business Developer with a strong focus on building and scaling SaaS products. At Weedly, I played a key cross-functional role—leading full-stack development while also driving business development, establishing partnerships with cannabis clubs, conducting discovery sessions, and shaping the product roadmap based on real user feedback. I specialize in modern web technologies such as **Next.js, TypeScript, Prisma, and PostgreSQL**, supported by solid experience in **UX/UI, responsive design, and frontend performance**. With a strategic, user-centered mindset and strong communication skills, I bridge technical execution with product vision and business growth.

PROFESSIONAL EXPERIENCE

Weedly.uy, Fullstack & Business Developer

02/2025 – Present | Montevideo

- Designed and implemented the full-stack architecture using **Next.js and TypeScript**,
- Developed **secure Server Actions** and SSR to ensure real-time consistency and optimized performance.
- Delivered a **modern, responsive UI**
- Led the **MVP definition and product roadmap**, prioritizing features with the highest business and user impact.
- Established **partnerships with cannabis clubs**, conducted discovery meetings, and adapted the product to operational and legal requirements.
- Oversaw **continuous product iteration** based on user feedback, enhancing adoption and satisfaction.
- Defined the **brand identity and communication strategy**, ensuring visual and narrative coherence across product and marketing touchpoints.

iParkings, Frontend Developer

11/2023 – 12/2024 | Montevideo, UY

- Designed and implemented key improvements to the self-payment system used by private parking lots in Uruguay, serving over **150,000 monthly users**.
- Reduced the payment flow from **6–8 steps to 4–6**, resulting in a **40% decrease in user complaints**.
- Developed a **“Free Parking” mode**, significantly reducing staff operational workload.
- Led **UX/UI design**, functional testing, and the creation of technical documentation for the self-payment platform.
- Collaborated closely with **backend and hardware teams** to ensure smooth and efficient system integration.

Tengo Karga, Full Stack Developer

11/2021 – 11/2023 | Remote

- Helped design and develop a **step-by-step ordering experience**, significantly improving usability compared to the previous long-form approach.
- Built an **impersonation feature** allowing super-admins to log in as users for internal support and user management.
- Participated in **QA tasks**, producing written and video documentation, and performing **unit and integration testing**.
- Contributed to the **GitHub development workflow**, including PR reviews, merges into dev, and tracking deployments to production.

Altisource Portfolio Solutions SA, Accounts Payable Sr. Analyst

02/2015 – 11/2016 | Montevideo, UY

- Processed and verified vendor invoices, purchase orders, and expense reports to ensure accurate payment processing and compliance with company policies
- Reconciled accounts payable transactions and resolved discrepancies with vendors
- Monitored aging reports and payment schedules to optimize cash flow while meeting payment deadlines and taking advantage of early payment discounts
- Collaborated with cross-functional teams including Procurement and Finance to streamline accounts payable processes and improve operational efficiency

Altisource Portfolio Solutions SA, Payroll Associate

12/2011 – 05/2013 | Montecideo, UY

- Processed payroll for company-wide workforce, ensuring accurate and timely wage disbursement across all employee levels
- Coordinated with Human Resources teams in the United States and India to maintain payroll accuracy and resolve discrepancies
- Served as primary liaison between employees and U.S. governmental offices for payroll-related inquiries and compliance matters
- Consistently met critical payroll deadlines in a high-accountability role where precision and timeliness directly impacted employee satisfaction
